Wheat Shows Amazing Ability To Resist Drouth

Heads Are Now Filled and Should Ripen Even Though There Is No More Rainfall—May Be 15 Bushels

A close inspection of the wheat fields in the vicinity of Bassano reveals the fact that the grain is filling out well in spite of the extremely dry weather and hot winds. No rain has fallen for weeks, and the ground appears desolate of moisture, but the wheat has exhibited remarkable drouth-resisting powers, and continues to grow and develop. The grain will, it is believed, ripen even without the aid of additional moisture. In fact, in the opinion of some experienced farmers, rain now would do more harm than good, for it is not required to ripen the grain and it would stimulate the growth of weeds. How the wheat has survived the hot winds, how it has continued to grow, to form nice plump kernels which are expected to ripen and make a good grade of wheat—how it has done all this in what is said to be the driest season in the history of the district, is a fact and speaks volumes for the skill of the farmers and the fertility of the soil in the Bassano district.

Wednesday afternoon the writer made a trip into the country to get some first hand information concerning the wheat crop. Many wheat fields were examined and a number of farmers interviewed. The best looking crops were those seen on summer fallow or breaking. A ripe grain measured eighteen inches to two feet in height, and in some places even higher. In some fields there were small patches here and there where the grain was very short, not more than a foot in height, with heads only an inch or so in length and containing only a few small kernels. But over most of the field the heads measured three or more inches in length, although some of these had been scorched on the top. Examination of the heads showed that the kernels were quite firm and most of them were full size. Even those heads which had been scorched on the tip contained good kernels in the lower part of the head. The soil appeared to be as dry as dust, and not a particle of moist soil could be found when the grain was pulled up by the roots.

Some fields were seen to contain a large area of straw that was still quite green. In fields where the grain was further developed the kernels were found to be quite firm, with some of them turning a golden color.

Police Make It Hot For The Hoboes

Sgt. Conway and Constable Ingers are diligently pursuing the itinerant "never-work" who appears in town about this time of the year. The diligence of these officers is due to several vagrants making themselves objectionable while begging from house to house.

On Monday July 22nd, Archie Klockhart, Walter Taylor and James Kennedy, all of no fixed abode, were convicted in Police Court, Bassano, on riding on a Canadian Pacific Railway freight train unlawfully.

May Get Fifteen Bushels. It is very difficult to place an estimate on what a field will yield this year, but a number of farmers expressed the opinion that they would get ten bushels to the acre, and in some cases as much as fifteen bushels was hoped for.

Wheat growing on stubble on a land will not yield more than a few bushels to the acre, and some of it will be hardly worth cutting. It is estimated that about fifteen per cent of the wheat crop in the Bassano

Wayne Club Shows Class To Defeat Bassano Golfers

Visitors Win Friendly Competition On Last Course Last Sunday

Members of the Wayne Golf Club paid a visit to Bassano last Sunday, July 21st, and won a friendly 18 hole competition with the local club. The visitors took ten and a half, while the Bassano won five and a half. The golfers from Wayne arrived on noon, and after lunch all players gathered at No. 1 tee and the first game started off at 2:00 o'clock. The visitors played good golf, and proved to be a little too strong for the home town players. Most of the ranking players in the Bassano club went to defeat, including Robt. McLean, who lost to A. Clifton one of the stars of the Wayne club; Dr. Keith, who was defeated by Dr. Bardson; Dr. Scott who lost to Bingham; E. P. Currie lost his game with McNeil, and McMillan and the grand champion, both came victorious.

Following is a list of the games:
Bassano Wayne
Robt. McLean 6 A. Clifton 1
Dr. Keith 6 Dr. Bardson 1
E. P. Currie 1 Wm. McNeil 1
Dr. Scott 6 Bingham 1
T. A. Hawkshaw 1 N. Munro 0
W. J. Smith 0 C. C. White 1
Guy Foster 0 A. H. Ingers 1
R. C. Robb 0
Dr. Simmons 1 L. Hart 1
D. Calbre 1 W. Taylor 0
A. E. Stewart 1 S. Pettie 0
D. Mitchell 0 A. Hutchison 1
Dr. Hawthorn 0 W. Thomas 1
A. McKee 0 W. Anderson 1
F. Farley 1 W. McPhee 0
Roy Smith 0 Const. Strip 1

The visitors all had a very enjoyable afternoon in Bassano, and expressed warm appreciation for the hospitality shown them. Arrangements were made for the Bassano club to visit Wayne on Sunday August 4th.

Initial Pool Payment One Dollar A Bushel

One dollar a bushel will be the initial payment on wheat for grain delivered to the 1929-30 crop, according to an announcement made by the club at the Alberta Wheat Pool office.

Last fall when a bad slump in wheat prices occurred the initial payment was lowered from \$1.00 to 85 cents, but the previous interim payment will be waived this fall. Rumors of an interim payment to be issued soon have been circulating throughout the country, but the Wheat Pool officials would make no comment upon this rumor.

ATTO DRIVERS MUST HURRY FOR LICENSES

Declaring that automobile drivers were not applying for their operating licenses at the expected rate, Inspector Davin, of the A. P. P. said that unless a better response was made very shortly, prosecutions would be effected to check up on the tardy ones.

The annual peace day celebration held in Chancellor for the past 12 years on the 13th of July was held in the form of a baseball game between Standard and Chancellor. Standard winning 6-3. A dance was held in the evening, the proceeds going toward the Memorial Hall fund. The Husar orchestra played and a goodly number of people from Standard and Husar were present.

Our old friend Bill Ritt is back on duty at the depot after a vacation spent in the mountains. We are glad to see him back again, for we missed his cheery smile and winning ways. Mrs. Iversen was anxious to see him at the depot after a vacation spent in aid of the Institute fund. Three tables were played, the winner being Mrs. C. Jorgensen. A delightful service by the hostess.

Mrs. B. Plumer, of Bassano, was an overnight guest of Mrs. J. Wheatley last Wednesday. Mrs. Wheatley returning to Bassano with Mrs. Plumer. Mr. Wheatley joined them on Friday to attend the annual U. F. A. picnic at Bassano. They went from Bassano to Charlebois to visit Fred and Clara Hain's home. Fred Wheatley and Clara Hain were the fortunate two from the (continued on page 5)

Bank Athletic Centre of Canada

All eyes will be turned to Banff next Labor Day for an event that the 40th annual Dominion track and field championships meet will be held at the beautiful resort in the Rockies. The fast 90-foot quarter mile race track, built up and surfaced like a tennis court and being specially prepared and resurfaced, will be the scene of the Banff Highland Gathering and Scottish Music Festival will precede and coincide with the championships and it is expected that many of the athletes will be present during the gathering in order to acclimatize themselves to the new surroundings in which they will compete. Highland pipers and dancers from all parts of Canada will be present at this assembly giving a Scottish flavor to the national championships this year.

Chancellor Game Association Has Misfortune In Raising Pheasants

The attempt of the Bassano branch of the Alberta Fish and Game Association to raise a flock of Mongolian pheasants this summer has not with much misfortune. Only three birds are left from the 18 eggs which were shipped for hatching.

After an auspicious start in which the first few settings hatched well, hard luck dogged the footsteps of the association. Only a small number of birds were obtained from the last two settings, and then the virus seemed to be under the spell of an evil eye, for many of the young pheasants were killed by the mother hens. Some were killed by weasels, and a few died of sickness. Now there are only three left.

Although regretting the loss of the pheasants, the association is not discouraged, and next spring intend to make another attempt to introduce these game birds into the district.

BASEBALL

A seven inning ball game was played in Bassano Wednesday evening this week when part of the Carman gay team stopped off on their way to the tournament in Camrose. The Bears defeated the visiting team which was augmented by three local players, the score being 5-4 for the seven innings.

Ralph Burrows made the biggest hit of the game when he walked on a home run in the fifth inning with the bases full and two men out. Jakey Hulmer scored the first five runs for the home team. The game was tied by Jack Vockman who finished the game. Bill B. caught all Ralph Burrows played back in his old position at first.

Next Sunday afternoon, July 28th, the Queenstown ball team will play a game with the Bears on a local diamond.

ANGLO-SCOTTISH DIEN

Many residents of Bassano will remember Canon Montgomery as one of the men who were devoted to the cause of the Anglican church during the illness of Rev. Leacock, by coming down from Calgary and conducting the services. His last service here, we believe being just previous to the induction of Canon Harrison. A man with many years service in the church and in the west, his passing will leave sorrow in many hearts. The death of Canon Montgomery recently occurred at Banff.

Countless News

COURTESY, July 25—Mr. and Mrs. Royal Burrows and family went to Makepeace for the day on Thursday.

Mrs. Gamble and children and Mrs. Simon were dinner guests at the Chamberlain home in Gem Thursday.

Mrs. McDonald and Mrs. Lippert, and children, of Bassano, spent Thursday with Mrs. H. Cowan.

Countess has now a swimming pool, and many people are taking advantage of it these hot days.

E.H. Heald says the hot wind Saturday ruined the third row of his wheat.

Some buildings were blown down, and also numerous hay stacks, in the fierce wind last Saturday.

Mrs. G. Fryberger and children, of Charlton, Montana, are visiting with their sister here. Mrs. Max Gamble and Mrs. Helen Burrows motored to Sedalia Sunday. They were accompanied by Mrs. Fulton and son, who have been visiting at the Burrows home.

Mrs. Norman Scott, of Calgary, is visiting with Mrs. Geo. Thompson for a few days.

Jack Armstrong returned Saturday after several weeks work on the government road-up.

On Monday ten men commenced work of repairing the telephone line between Grouse and Gem. The men are working at the field home.

Mr. and Mrs. Royal Burrows and family are leaving on a motor trip to Banff next week.

The farmers have had a very difficult job putting up hay this year on account of the strong winds.

Mrs. Fred Robinson entertained a number of the Countess children Monday afternoon at the school. The girls were in honor of her nephew and two nieces who are visiting there.

Mrs. Geo. Thompson was a caller at the Robinson home on Tuesday. A. M. Anderson, who has been away on a two weeks' vacation, is returning on Saturday.

It will be Sunday School next Sunday at 9:30 a.m. and evening service at 7:30. Everybody welcome.

Mrs. Mack Ferguson and Maurice, and Mrs. Susan, spent the day with Mrs. E. H. Heald on Wednesday.

Mr. and Mrs. Jas. Newman were callers at the Simon home Sunday evening.

"The Wedding March" This Week-End

Erisk von Stroheim has returned to the screen. And he has done it in a fashion which increases the interest in his work. He is undoubtedly one of the most fascinating personalities of the screen.

"The Wedding March," which is running at the Gem Theatre (Kris) in Calgary, this week, July 26 and 27th, von Stroheim has a remarkable cast of screen favorites in a production which he also directed. It is a story of a moving story of Vienna in the days before the world war.

Sports Day At Gem Wednesday 31st Of July

Horse Races, Bucking, Athletic Events and Games Will Feature Gem Sports Next Week

GEM, July 24—Everything is in readiness for the sports day program to be held in Gem next Wednesday, July 31st. The annual event is attracting a great deal of attention, and a big crowd is expected. A very attractive program of horse races, bucking, foot races, and games has been prepared by the committee, and the crowd is assured of a real afternoon's entertainment. One of the features of the program is a basketball game between a team from Dorothy and the Gem boys. The children's sports start in the morning at 10 o'clock, and the other events will be run off in the afternoon. Good prizes will be given for cash and valuable articles, will be awarded to the winners in all events. Refreshment booths on the grounds will supply ice cream, soft drinks, and lunch to the crowd. In the evening the dance in the school building, with the Bassano Orchestra playing the music, is sure to prove a most attractive feature.

Mrs. Dorothy Burns. Fire destroyed the barn at the E. C. Small farm last Saturday morning about 11 o'clock. Fanned by a strong wind the fire, which was of only a few minutes' duration, burned to the ground in a very short time. The house and other buildings were saved by the neighbors, who quickly arrived on the scene, and the fact that the wind was blowing the sparks away from the other buildings. A young calf was lost in the fire, together with several sets of harness and some other articles. Mr. Small wishes to thank all those who gave their assistance in fighting the flames.

District News. A. B. Claypool, M. L. A. for District 10, and J. Johnson, of Brooks, recently addressed a meeting in the Colony on pool matters.

Mr. and Mrs. A. L. Fryberger and Mr. and Mrs. Geo. Fryberger, of Montana, arrived in the Colony last week on visit relatives.

Miss Joan Dadds, of the White Farm, is a patient in the Bassano Hospital.

Miss Myrtle Pollock returned home last week from the Bassano Hotel. She is very much better.

Don Back, of Winnipeg, and Rev. Potter of Winnipeg, and the Rev. Galtbrant, C. P. R. officials, were in the Colony last Friday.

Miss Mary Waldron and Mr. Joey Galtbrant were recently married in Calgary, and are now enjoying their honeymoon in the mountains.

Mr. and Mrs. Ed. Jabraus, of Medicine Hat, are visiting relatives in the Colony.

Mrs. McGuire made a trip to Calgary on Thursday of this week.

R. R. Martin is spending a few days at his home in Gem.

HOW RIVER U. F. A. TO HOLD CONVENTION IN GLEBEEN JULY 30-31

The annual convention of the U. F. A. Box River Federal Constituency will be held in Glebeon Tuesday and Wednesday next, July 30 and 31. The convention opens Tuesday morning at 10 o'clock in the town hall.

The speakers will include E. J. Garland, M. P. for Bow River, the Rev. J. H. Macdonald, of the University of Education, and A. B. Claypool, M. L. A. for District 10.

BASSANO GIBBS TOP LIST IN MUSIC EXAMINATIONS. Betty June Frazier and Doris A. Fulton who tried the Toronto Conservatory of Music examination on June 26th when Mr. Ernest J. Farmer of Toronto presided, are to be congratulated on their respective success. Betty June Frazier passing with First Class Honors, the Introductory Grade, receiving second highest marks in the Calgary center in that division for less than six months. Doris A. Fulton, passed the Introductory School examination with honors, receiving the highest marks of any candidate for that division in Calgary. Much credit is due Doris, for on account of an accident, she began her exam work the first of April only.

Germany Will Act As Intermediary In Far Eastern Crisis

Berlin.—The German government has agreed to take over the interests of China in Russia, and Russia in China, for the period in which direct diplomatic relations between those countries remain disrupted. It was emphasized on all sides that this was a certain indication of the administration of the Chinese Eastern Railway.

Requests for its good offices came to the foreign office from Russia through the German ambassador at Moscow, and from China, through the legation of that government here.

The break between Russia and China over the Manchurian situation has become a diplomatic actuality with the German government's agreement to take charge of Russian interests in China and Chinese interests in Russia.

Nanking.—Formal notification of Russia's decision to cease relations with China was received at Nanking in a second note from Moscow, which carried out the warning of the first Russian note of July 13.

President Chiang Kai-shek summoned an emergency conference of Nationalist government leaders to consider the Manchurian question, after receipt of a telegram from Governor Chang Hsueh-Liang that the situation is extremely grave in view of Russian troop concentration along the frontier.

The Nationalist government had apparently not lost hope of reaching an amicable settlement with Russia. Japan was positively prepared to intervene between Russia and China in the interest of peace in the Far East. Premier Hanaguchi and Foreign Minister Shide Hara, while officially informed of developments, conferred on the situation as conveyed in the press reports.

Moscow newspapers continued strong disapproval of the Chinese reply to the original Russian note.

Seattle Water Front Fire

Union Pacific Dock Is Completely Destroyed By Flames

Seattle.—In Seattle's biggest waterfront fire since 1914, the Union Pacific dock was completely destroyed, with damage estimated at \$1,000,000. Six injured firemen were recovering from burns at the Providence Hospital.

The fire started beneath the flooring on the Bay end of the dock. Apparatus was drawn from twenty stations to fight the blaze, and traffic stalled on business streets while engine and truck companies roared down Seattle's hills to the waterfront. Three fire boats were also called out.

File Incorporation Papers

Three Montreal spinsters form Corporation With \$20,000 Capital. Sacramento, Calif.—Three spinsters, so they declared, of Montreal, Province of Quebec, Canada, have filed articles of incorporation with Secretary of State Frank C. Jordan. The papers entitle them to engage in any kind of business from building railroads to publishing newspapers under the name of the Plaza Service Corporation, on a capital of \$20,000.

The young ladies who legally admit they are spinsters, are Misses Ella Dolores, Bertha Corina and Jessie Dickson.

Many Students From West Kingston, Ont.—Queen's summer school, in progress now, attracts students from all parts of Canada. Saskatchewan sends 23, Manitoba 3, Alberta 8, and British Columbia four. Two are from the United States and one from China. Canadian history is strongly emphasized. The students enjoy the historic place to Kingston and the use of Queens library.

B. C. Fire Losses Higher Vancouver.—Fire losses in British Columbia during 1928 amounted to \$2,667,554, against \$2,822,905 in 1927, showing an increase of more than forty-four thousand dollars according to the annual report of J. A. Thomas, provincial fire marshal.

Expect Larger Apple Crop Ontario.—Canada will have a big apple crop this year. The commercial crop is expected to be 15 per cent. greater than last year and 21 per cent. greater than the five-year average with a total of 3,609,417 barrels.

Had Miraculous Escape

Vancouver Salvaged Plan Under Interurban Car Had Head Injured

Vancouver.—Charles Klingensburgh, aged 30, a Vancouver salesman, was pinned for more than a half hour in his demolished touring car under a 25-ton steel bridge when electric interurban car, but escape with a bruised hand. The interurban had to be jacked up before he could be freed.

Klingensburgh was driving across the intersection when the interurban crashed into him, overturned his car and ran up on top of it. Although the electric car was crowded, no one on board was injured.

Klingensburgh was imprisoned in the driving seat of his automobile with only his head and shoulders visible. Police squads, railway employees and ambulance men laboured feverishly to extricate him, but without success until a large jack was brought and the interurban lifted. The imprisoned man directed the operations, although suffering agony because of the manner in which his hand was caught. After his release it was found at the General hospital that he had suffered no other injury.

RUSSIA BREAKS OFF RELATIONS WITH CHINA

Moscow.—Russia has broken off diplomatic relations with China.

The Soviet government made public its reply to the Chinese note, the latter having come in response to an ultimatum from Russia. In this note the Soviet Union said that all means of reaching an amicable settlement had been exhausted.

The note placed the entire responsibility for all consequences upon the Chinese government. It announced also that all Soviet diplomatic and consular officials and all government communication with China would be recalled at once from China.

It further declared that all Soviet officials would be recalled from China and that all railway communications between Soviet territory and China would be suspended, and that the diplomatic and consular representatives of the Nanking government would be ordered immediately to leave the Union of Soviet Socialist Republics.

The Russian action in breaking off diplomatic relations with China came at the expiration of time set in an ultimatum which the Soviet Union dispatched to the Central Republic headquarters on July 13. That ultimatum gave the Nanking government, at Nanking, three days in which to retract its action in seizing the Chinese Eastern Railway in Manchuria.

It also demanded restoration of office of the Russian officials who had been deported from their places in the Union of Soviet Socialist Republics. At Sukhar Bay the entire townships has become submerged, with 12 deaths. In Middle Sink hundreds of cattle died from exposure in torrential rains. Miles of desert have been transformed into a huge lake.

Government Is Powerless

Cannot Refuse Clearance To Liquor Boats Under Present Law

Ottawa.—The matter of refusing clearances to liquor-laden boats destined to the United States is not within the competence of the federal government as the law stands at present, nor can it come within that competence until authority for such a course has been given by act of parliament.

This was the statement of Hon. W. D. Miller, minister of national revenue, in an interview. "I adhere to the sentiments expressed on that subject last session, and I am convinced that subsequent developments have borne them out."

Ottawa.—Canada's Boy Scouts contingent to the International Jamboree at Birmingham, England, on July 27, was reviewed on Parliament Hill by Premier W. L. Mackenzie King. Later, addressing the boys and their leaders—representative of every province of the Dominion and the Yukon Territory—in the Hall of Fame, the parliament building, the Prime Minister made an inspiring appeal to the youth of this country for a full realization of citizenship in this Dominion and in the Empire.

Announcement Of Naval Disarmament Terms Coming Soon

Endorse Prohibition Act

Prince Edward Island Favors Continuance Of Dry Law

Charlottetown, P.E.I.—The Prohibition Act, in Prince Edward Island was decisively endorsed by plebiscite. Balloting was characterized by the same general lack of interest which preceded the plebiscite. All of the returns had not been compiled, but the Prohibition forces were conceded a large majority. Fine weather favored the voting, although the temperature hovered around 84 degrees.

Approximately 17,000 electors cast their ballots, about 50 per cent. of the vote polled in the general plebiscite of 1927, when the Conservative Government of J. D. Stewart went to the country with a policy of government control of the sale of liquor, only to be overwhelmingly defeated by the Liberal party of Premier A. C. Saunders.

Reviews Boy Scouts

Premier King Addresses Contingent Going To International Jamboree

Ottawa.—Canada's Boy Scouts contingent to the International Jamboree at Birmingham, England, on July 27, was reviewed on Parliament Hill by Premier W. L. Mackenzie King. Later, addressing the boys and their leaders—representative of every province of the Dominion and the Yukon Territory—in the Hall of Fame, the parliament building, the Prime Minister made an inspiring appeal to the youth of this country for a full realization of citizenship in this Dominion and in the Empire.

In the soft twilight of a summer afternoon mother came upon young hopeful standing in a brown study by the greenhouse door. His hands were clasped before him, and his lips were dejectedly parted.
"Why, what's the matter, lamb?" mother asked, bending over him.
"I'm thinking, mother."
"What about, little man?"
"Have gooseberries any legs, mother?"
"Why, no, of course not, dearie."
A deeper shade fell across dearie's face, and he raised his glance to her.
"Then, mother, I've swallowed caterpillar!"

Played like the Hoppies.
Among other novelties to be produced are two new cornet solos.

MANY HOMESTEADS

Winnipeg—Homesteads filed upon in western Canada in the first five months of the present year amounted to 2,389, as compared with 2,850 for the similar period last year. Alberta contributed the largest number, with 2,387, as against 2,249 for the first five months of 1922. Saskatchewan comes next with 1,387 against 1,221; Manitoba next with 261 against 207; and British Columbia next with 241 against 208.

We have never heard of a railway crossing accident in which the locomotive came off second best.

The talkies have turned Hollywood into "Hollywood."

Speaking of war debts—there's limony.

Many a girl couldn't afford so many pairs of silk stockings if she didn't eat them with her cigarette coupons.

An advertisement says: "What rose on in your mind when you buy a tie?" Well, anyway, we know what comes out of our pocket.

The newest innovation in golf is a practice course situated by electric lights for night play. Before has come to the relief of the poor harassed husband now when he has almost exhausted his supply of excuses for coming home late.

THE FOREIGN IMMIGRANTS
There is a Kansas, Saskatchewan, the other day, the sons of Freedom were given a free bath, after burning many schools in the district, which they gathered at a meeting to protest against the action of government. Kansas citizens turned the fire hose on the Dunkelhousers and dispersed the crowd.
The sons of Freedom don't seem to want to fit in with Canadian life, and they defy consular authority.
The country would be far better off without these people. We want a Canadian people who will work and live in harmony for the upbuilding of a greater Canada—not a population riven by racial and social prejudice. The immigrant shape himself to Canadian life, and actually become a Canadian. If he is not this type of immigrant he is very undesirable.

THE CRY FOR BREAD

Everyone who reads the crop reports is aware that Alberta's wheat yield this year is small. One estimate is 50,000,000 bushels, about half that of last year. From many districts come stories of drought, crops scorched with the hot sun and winds crops that will not be worth the cutting.

The crop failure in many districts will bring hardship to the farmers, and already the provincial government is considering steps to provide relief for the grain growers in the drought-stricken areas.

The district of Sunnyside, along the Hanna-Warrior railway, is hard hit by the dry year. The Calgary Herald recently published a letter written by a farmer of the Sunnyside district, Matt O'Reilly. It was called an open letter to Premier Brodie, and the writer told of the great loss suffered by Sunnyside farmers this year, and commended Premier Brodie on his move to investigate relief measures for farmers.

The Sunnyside area and adjacent districts, of course, Central Alberta, Jenner, Hobbish, and others, are located in what may be termed the "dry" belt. In these districts rainfall is generally very light, and crop failures are frequent. The territory was settled by homesteaders in the years of 1910 and 1911, and based on fifteen years of farming experience, wheat growing there has been found to be a very hazardous business.

The successive crop failures of the years 1917, 1918, and 1919 so "impoverished" the settlers that it was necessary for the government to provide them with some measure of relief. They had no money with which to buy seed grain, feed for their stock, groceries, or clothing. They were near starvation.

So the provincial government provided the farmers with these necessities in order that they might carry on in the hope of getting a good crop the next year. But the government used a very careless method of supplying relief, and the privilege was abused. Instead of purchasing only those things which they were accustomed to getting, some farmers bought expensive luxuries, decked out their families in swell clothes, and almost turned a profit into a season of feasting and merry-making. It is even said there were instances where a farmer obtained much more seed grain than he required, sold the surplus, and had a good time on the money. The gov-

TO BE INFERIOR TO CANADIAN WHEAT

American Grain in Transit Through Montreal & Less Clean

Montreal, July 24—American grain in transit through Montreal was described yesterday as being much less clean than grain of Canadian origin by William Thornher, chief deputy grain inspector at the Port of Montreal, who appeared as a witness before the Saskatchewan Grain Commission sitting in Montreal. Giving evidence in absence of the inspector, Arthur A. Bowen, he explained that in all fairness to the Americans, it must be stated that it arrived here with the percentage of dockage or foreign matter contained in the bill of lading.

The second day's session of the commission brought forth much technical information concerning certificates and forms employed by the Montreal harbor commission in routing grain.

A CAMPING VACATION

The school term ended, the roads in good condition, the car running with a contented purr, is a combination that just naturally leads to the thought of a camping vacation.

The people of Alberta are so fortunate in having many natural beauty spots a short ride from the back door, that this form of holiday is becoming more popular every year. It is economical and it is healthy if certain precautions are taken.

Care should be taken to find out if all drinking water is pure. If this cannot be assured then the water should be boiled or chlorinated. The latter is a very simple proceeding, and any druggist will supply the lime and give the few necessary instructions.

If there is a baby or toddler in the party who must have milk, it is a wise proceeding to sterilize it.

Before diving into a likely looking hole for the morning splash be sure there are neither rocks nor roots. Do not bathe when very hot or immediately after a heavy meal. It would add to the safety of the party if at least one member could swim well. Carry simple first-aid kit.

Literature on first aid can be obtained from the Canadian Red Cross Society, 467 Civic Block, Edmonton, Alberta.

Second Nature

"Little boy, don't you know what becomes of boys who use such bad language?"
"Yes'm; they grow up and play golf."

W. S. GRAIN SAID TO BE INFERIOR TO CANADIAN WHEAT

American Grain in Transit Through Montreal & Less Clean

Montreal, July 24—American grain in transit through Montreal was described yesterday as being much less clean than grain of Canadian origin by William Thornher, chief deputy grain inspector at the Port of Montreal, who appeared as a witness before the Saskatchewan Grain Commission sitting in Montreal. Giving evidence in absence of the inspector, Arthur A. Bowen, he explained that in all fairness to the Americans, it must be stated that it arrived here with the percentage of dockage or foreign matter contained in the bill of lading.

The second day's session of the commission brought forth much technical information concerning certificates and forms employed by the Montreal harbor commission in routing grain.

Why Two Commissions?

The Chicago, said Justice Thorne of Saskatchewan, witness to know by the authority there were two percentages of the Eastern standards board, or Mr. Thornher explained that set standards for Canadian grain grown in Ontario and Quebec, and all points east of Port Arthur and Fort William while another section of the same Eastern standards board sat in Montreal.

It was explained that chiefly American grain was imported in Montreal, and only according to Montreal standards for Canadian grain grown in the early part of the season from the parcels passing through.

"You don't inspect any grain according to the western Canadian standards," S. F. Thompson, K. C., counsel for the Royal Grains Commission, asked the witness. Mr. Thornher replied that samples of Western grain were sent to the Montreal branches for their information, but that they were not called upon to make use of them. Neither were the local inspectors requested to inspect any grain from the United States except as some as possible.

Fix Standards at Toronto

Standards for the Western Canadian Grades were fixed at Toronto, the deputy inspector continued, but he could not explain why it was customary to perform this function in that city.

Asked by Mr. Thompson if the In-

Inspection branch was not asked for other documents besides the seaboard inspection certificate. Mr. Thornher replied that in seasons when the grain was tough, the port requested letters of condition, explaining that the grain was in good order, cool and sweet, when inspected and shipped from Montreal.

ROAD MARKING PROGRAM IS ADOPTED BY A. M. A.

Marking of Alberta roads to greatly aid tourists has been decided upon by the Alberta Motor Association, affecting operations in both north and south. It is expected that fully \$10,000 will be expended, though it is realized that this will handle but a fraction of what should be done.

A. B. Mackay, president of the A. M. A., expressed his regret that the Alberta government had not carried out an extensive scheme for road marking, when recently in Edmonton. "It was understood that such a policy was to be carried out, and it is regrettable that it has not been done."

Signs will be placed by the A.M.A. along the Blue Trail, so it was announced by Fred R. Brason, president of the Calgary branch of the association. The program also includes placing of signs on roads to the oil fields, leading in from the north and from the south; also from Calgary to Medicine Hat. The fact that there were numerous complaints caused the association to take action as soon as possible.

President Frank Barnhouse, of the Edmonton branch, said that in the north the program included marking of the highway from Edmonton to Regina, Edmonton to Wainwright, from Edmonton to Athabasca, and from Wetaskiwin to Macklin.

Pussyfooting

"Don't he ever take advice?"
"Occasionally, when nobody is looking."

Free of Duty

"Did you see much poverty in Europe?"
"Yes, indeed. A good deal. In fact I brought some back with me."

Call the "Truant Officer"

"How do you play hooky from correspondence school?"
"Oh, I send them an empty envelope."

WORLD HAPPENINGS BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending name questions have been concluded and an agreement has been signed.

The first loan issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the "provincial loan board."

Pepling's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in leisurely fashion, and inconveniencing patrons.

Two United States fishing vessels seized by the Canadian Government Fisheries Protection steamer "Mala spina," at Goose Harbor, 100 miles south of Prince Rupert, recently were released by Mr. Justice Martin in the Admiralty Division Court.

The much debated revised prayer book of the Church of England will likely be discussed in the House of Commons again following its endorsement by the bishops assembled in the convocations of Canterbury and York recently.

Dr. Frank L. McKinnon, well known in the medical profession, died at Winnipeg recently after a brief illness. During the war he served for four years in Mesopotamia and was decorated with the Military Cross.

World automobile production increased by more than 1,000,000 vehicles in 1928, as compared with 1927, and set a new record total output for the industry, according to a report of the U.S. Department of Commerce. In 1928, Canada produced 243,382 cars, as compared with 179,064 in 1927.

Aaron Sapin, famous cooperative marketing expert from the United States, will again tour Saskatchewan this summer in his capacity as a 100 per cent membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic dispatch recently. Mr. Sapin's voice broke down during a recent tour of the West.

Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council reserved judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 18 of the Canadian Fisheries Act of 1914, were ultra vires of the Dominion parliament. The important point at issue was whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament can set up a system of licensing of fish canners as it sought to do under the sections of the fisheries act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as the umbrella fishermen of Japanese origin.

Towns Form Boards of Trade

"There is no better evidence of faith in a district than the example of its business men forming a board of trade to advance its welfare," says the Edmonton "Chamber of Commerce News." During the last month, boards have been organized at the following towns: Thorhild, (R. Baker, secretary); Kinross, (C. R. Field, Secretary); and Slave Lake (A. Penn, Secretary).

Record of Fire Losses

Fire losses in Canada during the week ended July 10, 1929, are estimated by "The Monetary Times" at \$239,500, as compared with \$139,200 for the previous week, and with \$264,700 for the corresponding week of last year. From January 1, 1928, fire losses totalled \$11,335,950, and from January 1, 1929, to July 10, 1929, they were \$12,976,250.

"Your boy has torn up the manuscript of my new novel. He says, 'Good! I can see that he will make a good dramatic critic.'—H. Travass, Rome."

Poultry Methods in China Are Simple

Hen Eats What She Finds and Sleeps Where She Can

Although China is a producer and exporter of eggs, and the Yangtze Valley is one of the greatest producing districts, poultrymen's methods there are primitive, according to a writer in the Western Producer, (Saskatoon).

"During the past twenty years I have spent most of my time among the villages in the Yangtze Valley, and never have I seen a poultry house," he quotes an English resident of China. "The fowls always sleep in the houses of the villagers, and roost where they can, mostly on the roof of their owner's bed, while every hen hatches her brood in the living room, since not only is there no other place where she can do so, but it is about the only place where she is secure from thieves, rats and stoats, with which the country is infested."

As every poultry keeper is aware, the quality and food value of an egg depends to a very large degree upon the wholesomeness of the food supplied to the hen which produces it. It would break a Chinese village's heart, and would be considered wickedly wasteful to give food of better quality than a thing as good as a duck. So the fowl has to forage for its own sustenance, and when it is that in the villages there are no sanitary arrangements whatsoever. It will at once be apparent that the fowl has to procure its food in appalling circumstances, as appalling indeed as to render unwholesome any attempt to give particulars. As to water, it is usually green and slimy and always infested in evidence by its immense stretch, which also serves for cattle to wallow in.

"Considering that the fowls of the Yangtze valley are not only a nuisance, in which maggots form, it will be seen that the fowls' sleeping quarters are of the filthiest description."

"After an egg is laid, it is kept in the house for days, under the horrid insanitary conditions above described. A collector will come to the peasant towns periodically visits the villages and gathers what eggs are available. These he carries to the wholesale shops in the various towns about once a week."

"The packing done carried on by the British is exceptionally clean as far as the places themselves are concerned, but one cannot get away from the fact that it is the native women who handle the eggs, and break all those which are exported in liquid or dried form. The native women thus employed cannot, to say the least, be commended on the grounds of cleanliness, while no self-respecting editor would permit me to describe the things that happen while they are thus engaged."

Smallest Railway Train

Made On Scale Of Eight Hundredths Of An Inch To A Foot

The smallest known working scale railway in the world has been made by Mr. J. Langridge, of the Wembley Model and District Model Railway Club. In every detail it was constructed at a scale rate of eight-hundredths of an inch to a foot. At its tallest point, the cab of the locomotive is only 1/8 inch high and the track on which it runs is 1/8 inch gauge. It is operated by an electric motor housed in the tiny engine. The train, with its engine, three coal cars, and two passenger coaches, fits into one side of a cigarette box designed to hold fifty cigarettes.

Growth Of Co-Operation

Catching The Vision Of Things That Might and Can Be Done

"Co-operation is a growth and a way of living. Each day a larger and larger number of men and women awaken to the full significance of the truth that no man can live unto himself. There are still many who even in this young country, where progress is second nature, who have not been awakened. They have not yet caught the vision of things as they might and can be. They simply do not understand, and we must not become impatient even with these backward members of society."—A. J. McNeill, President of Saskatchewan Wheat Pool.

Only Three Minutes Late

The Indian mail, a record cargo by air, consisting of over thirty thousand letters, arrived at Croydon Aerodrome three minutes before scheduled time after its five thousand mile flight.

Allegedly the thing with which an amateur responds to an encore.

Japan Favors Canadian Wheat

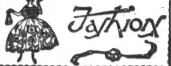

Wheat From Dominion Has Supplanted U.S. Product In Japanese Market

Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tetsuro Shoda, president of the Nishin Funo Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centres of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver. Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity of 25,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized grading.

Winnipeg Newspaper Union

Helen Wills, who won the women's single championship at Wimbledon, England, defeating Helen Jacobs, her fellow Californian, in straight sets, 6-1, 6-2.

Cross Crossings Cautiously

National System Starts Drive To Combat Level Crossing Accidents

As a further effort in the campaign to reduce crossing accidents, the Canadian National Railways, through the Director of Safety, W. Booth, have distributed two thousand copies of a special card on the lithographed face of which, is an appeal to motorists and others, to "Cross Crossings Cautiously." These posters are being sent out from the headquarters of the three regions in Canada, at Montreal, Toronto and Winnipeg. Atlantic, Central and Western, respectively, so that every Canadian National gauge crossing in the Dominion will be marked. The instructions are to give these posters on poles close to the railway crossings and on the right hand side of approach.

In the letter of instructions it is stated: "The time is now opportune when aggressive methods must be taken to combat the increasing number of highway accidents."

Abolish Corporal Punishment

Juvenile Offenders In Britain May Escape Birch Rod

Youthful law breakers in England will no longer have to fear the birch rod if a movement to abolish corporal punishment for young offenders is successful.

Mr. Clarke Hall, London police court judge, evinced his opposition to the widespread practice of "birching" at a conference of 70 judges and presented a report showing that 80 per cent of the boys who had been whipped in a certain court came back again charged with similar offences.

Prosperity Reflected

Marked Growth Is Evidenced On All Sides In City Of Regina

In a booklet issued by the Regina Board of Trade, dealing with statistics of the city as revised on June 1st, marked growth is seen on all sides in the capital of the province. Building permits for the first five months of the year reached a total of \$4,598,772 as compared with \$1,000,855 for the corresponding period of 1928, while bank clearings, postal revenue and other such indices to prosperity all reflect prosperity and expansion.

Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill, Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of \$100,000 for the seed cleaning plant and warehouse at Moose Jaw.

The Columbia Ice Field

The melting waters from the Columbia Ice Field in Jasper National Park, Alberta, feed the sources of three historic rivers in the Canadian west, the Athabasca, the Saskatchewan, and the Columbia, which flow to three separate oceans.

More than half the arable land in Japan is in rice.

Most of the bacon eaten in Britain is imported from Denmark.

CAPTURES 'CHAMPIONSHIP'

Government Has Data Concerning Water Power Throughout the Dominion

The comprehensive system of compiling all available data concerning water power resources and development throughout the Dominion, instituted by the Dominion Water-Power and Reclamation Service, of the Department of the Interior, made years ago, and maintained with constantly increasing efficiency and thoroughness, places exceptionally complete information on this great natural resource at the disposal of the public. This compilation at one central source, for areas under either Dominion or provincial administration, the latter by collaboration with the provincial governments, enables an exceptionally complete review of the resources of any watershed or other area in the Dominion.

Information On Water Power

Awarded Scholarship

Chemistry Instructor At Saskatchewan University Receives High Honor

Norman S. Grace, instructor in chemistry at the University of Saskatchewan, has been awarded a B.Sc. scholarship to the University of London, Eng., where he will continue his studies in chemistry. This award is considered a high honor and is only one of three scholarships for the British Empire, and they have not often been given to Canadian students.

The winner is the son of Mrs. E. R. Grace, 1034 41st Street. S. A. H. Grace, who recently won first class honors in physiology at Oxford where he holds a Rhodes scholarship, is a brother, as is also the late Dr. H. Grace, who has frequently appeared in University honors lists.

For First Offenders

Attorney-General Of Ontario In Favor Of More Frequently Suspending Sentence

The Attorney-General of Ontario, Hon. W. H. Price, would call the sympathy of judges and others in favor of more frequently suspending sentence on first offenders. After a long and varied experience it is his opinion that lives are frequently wrecked by court sentences for offences against the laws that are really not very serious in character. It is undoubtedly true that once a boy or man has the stigma of conviction against him he is badly handicapped in the race of life. Mercy is not being asked for those hardened in crime, but for those who have committed their first fault. One cannot but sympathize with the idea.

A woman first sheds a few tears—and then proceeds to open the telegram.

A pool of thread was unknown 125 years ago.

Michigan has by far the greatest coal line of any state.

New Antarctic Expedition

Sir Hubert Wilkes Will Sail South To Locate Weather Station

Sir Hubert Wilkes, explorer, has returned from Europe to complete arrangements for his next expedition into the Antarctic.

Final preparations for the departure will be completed on the Pacific coast, Sir Hubert said. His expedition leaves September 20, for Montevideo, where it will take a whaling ship to Deception Island, the Antarctic base he has already established, and where he has two planes ready.

The purpose of the expedition is to locate another base for a weather station. Sir Hubert said he has already found eleven such bases, but expects the twelfth to be nearer the South Pole.

In the course of establishment of the base last year, Sir Hubert found that Graham Land in the Antarctic was a series of islands instead of one large stretch of terrain.

Come To The Fair

Many People Take Advantage Of The Friendly Offices Of The Red Cross Society

"The Last Best West" is wild and walled at least once a year in Alberta. Every county in the province and village is in gala attire for its annual exhibition and stampede. From far and near the people come to the fair, many attractively attired in picturesque rompers and caps, to picture with their farm stock, samples of grain, garden produce, etc. There are fairs, horse races, and bucking contests to delight the crowds.

At every fair, there may be seen a little friendly white tent, with the sign of the Red Cross annexing to the people that here is a rest room and First Aid Station, on guard in case of emergency.

The tent is generally filled with visitors—a rendezvous for tired mothers who desire to nurse their babies in peace—or leave their smaller children in care of the nurse. Adorning the walls of the friendly tent are many health posters and photographs, the latter depicting the wide-spread services which the Alberta Red Cross renders to children in schools, to cripples in hospital, and the friendly welcome extended to settlers, home-sick in their new pioneer homesteads in a strange land.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

More than 3,500 shoes were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

If some people were to weigh every word they utter it would be decidedly worth on the scales.

WINDOLITE

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and invigorant. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective against the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention of cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are actually excluding these vital health-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-entire want.

Exhaustive experiments have conclusively proved that it is a most effective sun-ray shield, and that it admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants, and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, and has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is the most valuable flexible material in the world. It is now being successfully used for sunrooms, verandas, school factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A pure white **WINDOLITE** is made in England, while a square yard of glass of ordinary thickness, weighs about 15 to 160 lbs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, F.o.b., Toronto.
